

BoltHex™

FASTENERS

Fit it Fast, Make it Last

BoltHex Presents a premium range of Hex Head Self-Drilling Screws (SDS) specifically engineered for heavy-duty industrial and construction applications. Designed for superior strength, our screws eliminate the need for pre-drilling, ensuring a faster and more efficient installation process.

Key Features & Benefits

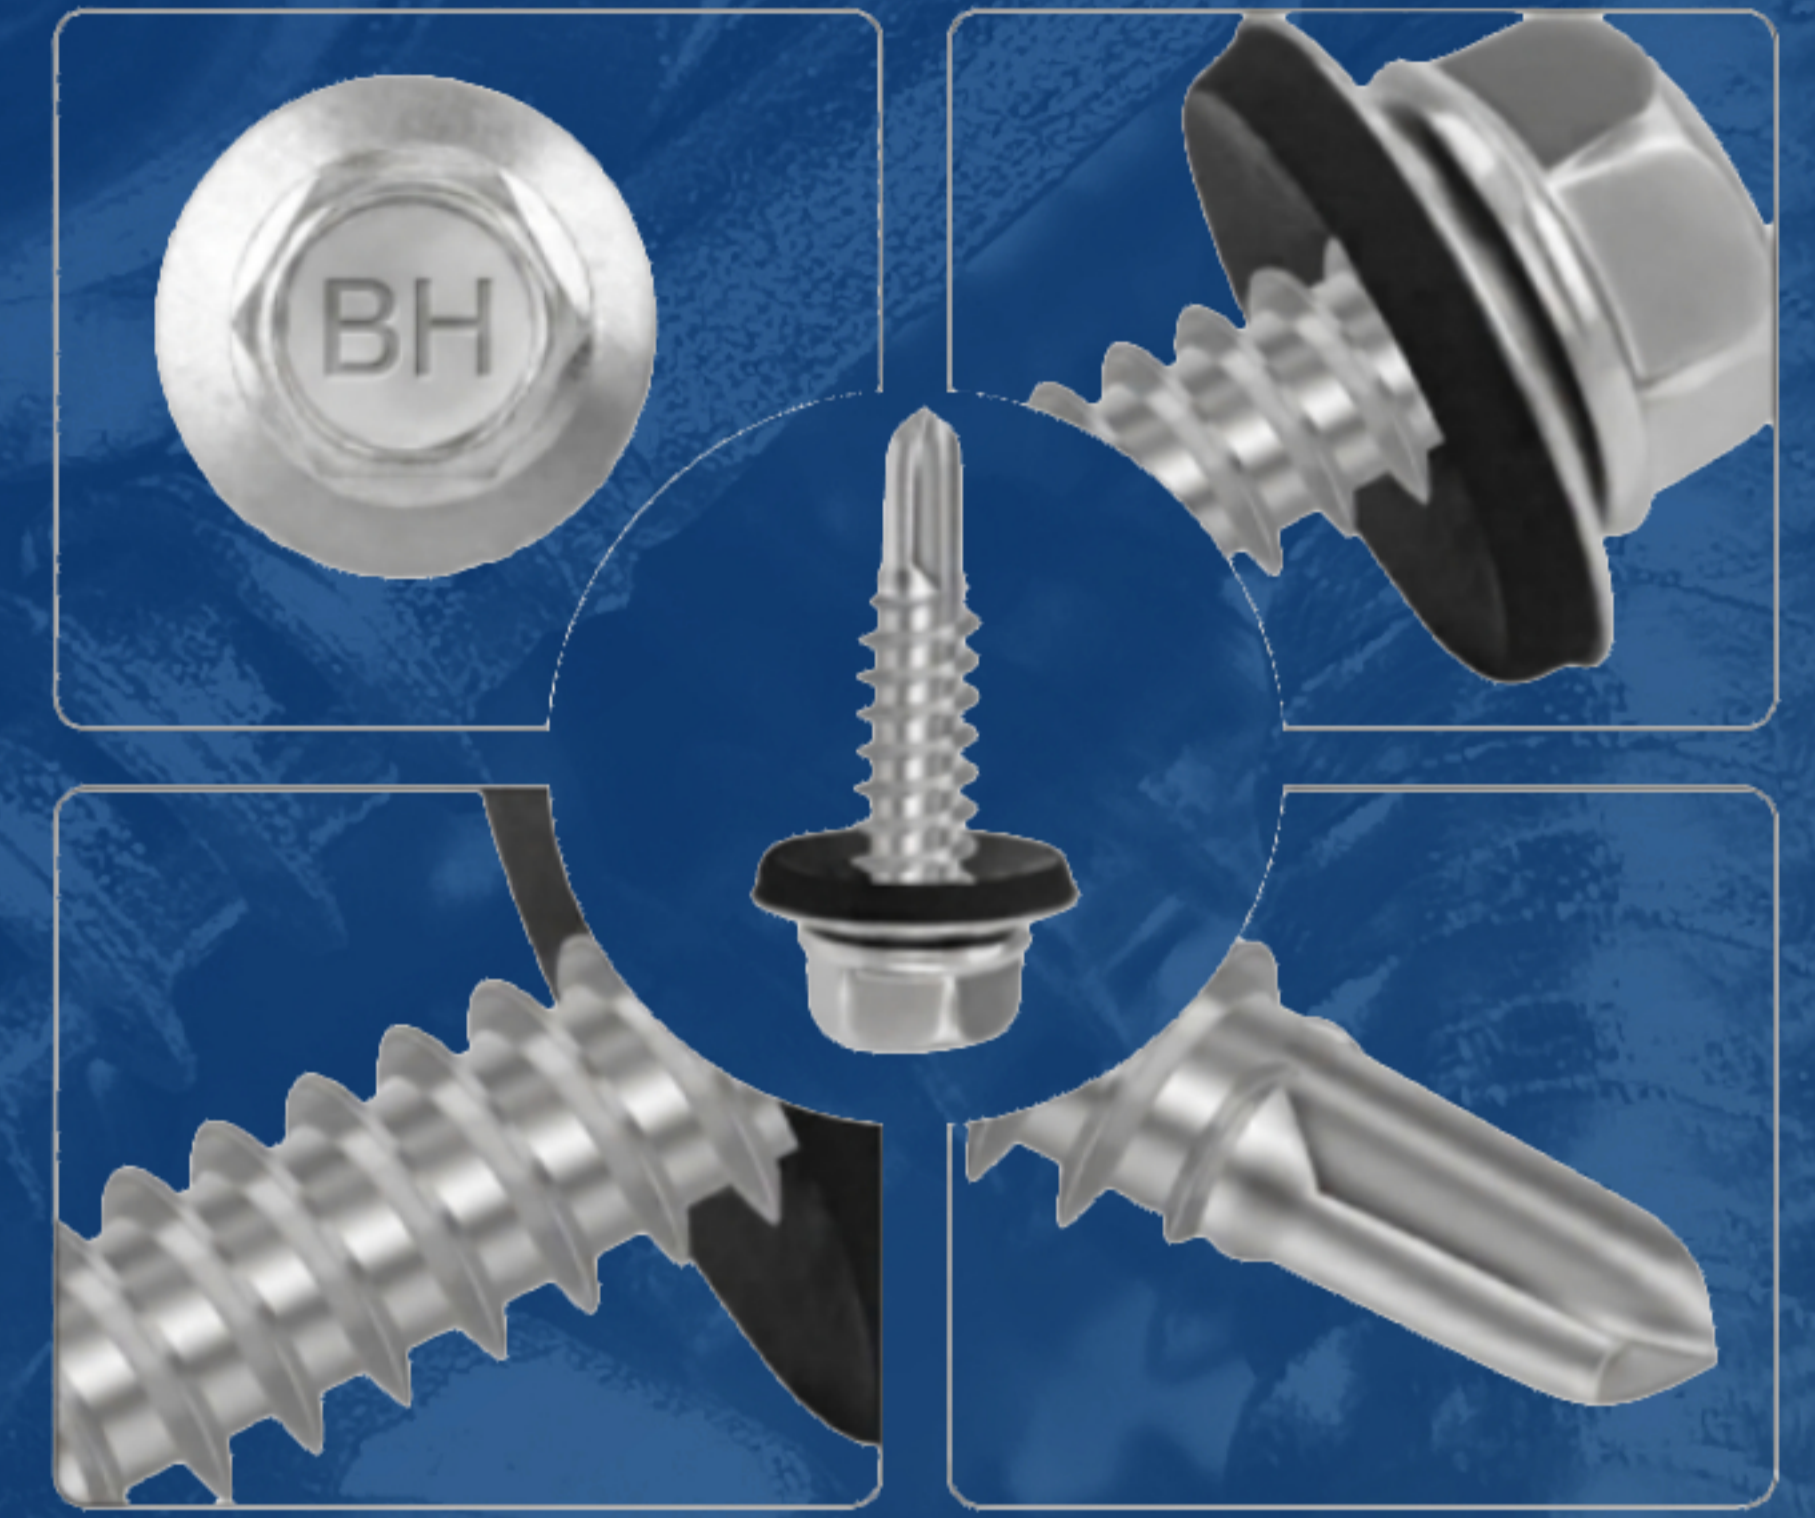

Precision Drilling Point: Advanced drill point geometry allows for rapid penetration through thick steel sheets without slipping.

High Torque Strength: Manufactured from hardened steel to withstand high-stress environments.

Superior Corrosion Resistance: Coated with high-grade Zinc or Ruspert finishes to prevent rust and ensure long-term durability.

Leak-Proof Sealing: Equipped with high-resilience EPDM Bonded Washers that provide a permanent, weather-tight seal against rain and moisture.

Perfect Thread Engagement: Precisely rolled threads offer maximum fit, pull-out resistance, and a vibration-resistant grip

FEATURES	SPECIFICATION DETAILS
Head Type	Hex Flanged / Washer Head
Material	Hardened Carbon Steel / Stainless Steel / Mild Steel
Coating	Zinc / Ruspert / Epoxy / Xylan
Washer	EPDM Rubber Washer / EPDM Stainless Steel Bonded / EPDM Aluminium Bonded / EPDM Metal Bonded (14-19MM)
Drilling Capacity	Upto 10mm - 12mm Thick Steel
Corrosion Resistance	24 - 1000+ hours Salt Spray Test (SST) based on coating grade
Sizes	10×19 10×25 12×25 12×35 12×45 12×55 12×68 12×75 12×90 12×100 12×110 12×125 12×150
